Case Study

Film distributors use the Custos Resources platform to market produced projects to local and international distributors. Films are uploaded to the cloud platform, whereafter trailers, posters and press pictures are added to the project. Projects are securely shared with potential buyers who can access the rich media associated with the project. Over 800 000 film projects have been distributed with the Custos blockchain security, with a 100% success rate.

- An **administrator** creates a new project and invites relevant roles
- A **producer** uploads the full cut of a movie
- A **trailer-maker** downloads the movie and uploads a trailer
- A **photographer** uploads photos
- An **artist** downloads photos and uploads a poster
- **Film buyers** are notified about new projects and can view trailers, meta-data, posters, and full secured copies of screeners.
